TECHNICAL SKILLS

Core: React, Next.js, Astro, TypeScript, JavaScript, Node.js, Python, PHP/Laravel

Data & Backend: PostgreSQL, Supabase, MongoDB, Firebase, Prisma, REST APIs, Authentication, RLS

Delivery: Vercel, Docker, Linux, Git, Cloudflare, DNS, WordPress, SEO

Automation: n8n, Zapier, GoHighLevel, AI coding tools (Claude, Codex)

EXPERIENCE

Software Developer (Full-Time)

March 2026 – August 2026

CodeLigence

Germany, Remote

- Developed production full-stack applications using TypeScript, JavaScript, Python, React, and Node.js across internal and client-facing projects.
- Delivered 4+ production features, including email two-factor authentication, stock-state automation, analytics dashboards, and AI-agent capabilities; added 13 integration tests for stock, quotation, and administrative workflows.
- Built and evaluated an AI-agent product using Google ADK and Vertex AI Agent Engine, passing all 6 evaluation cases; improved delivery reliability through AI-assisted workflows, Git worktrees, and automated build and test gates.

Freelance Software Developer

January 2023 – Present

Upwork & Direct Clients

Remote

- Built and launched 8+ production websites for Australian businesses using Next.js, TypeScript, Tailwind CSS, Vercel, and third-party email services.
- Managed multiple concurrent projects from requirements through revisions, testing, DNS, domain migration, redirects, email authentication, lead forms, and deployment.
- Built workflow automations and CRM integrations with n8n, Zapier, and GoHighLevel; maintained responsive, SEO-friendly sites and preserved traffic through structured redirects.

Full-Stack Developer (Full-Time)

September 2025 – February 2026

Skill Cloud

Australia, Remote

- Built role-specific dashboards for a staffing platform connecting Filipino workers with Australian clients.
- Developed an end-to-end booking workflow for talent discovery, booking submission, status tracking, and booking management.
- Contributed reusable frontend components and backend integrations for a two-sided marketplace serving workers and clients.

PROJECTS

AudioVideoNation | *Astro, React, TypeScript, Vite, WordPress*

[Live Site](#)

- Implemented a WordPress-backed catalog integration for an Astro 5 and React 19 storefront, separating content management from the customer-facing site.
- Built product-discovery paths that help buyers navigate AV equipment by category and use case; optimized Core Web Vitals to achieve a 95+ Lighthouse score.

McGregor Media | *Next.js, React, Tailwind CSS, TypeScript*

[Live Site](#)

- Built a responsive Next.js lead-generation site for an Australian agency serving trade and service businesses.
- Created conversion-focused service pages for paid advertising across Google, Facebook, Instagram, and TikTok.
