EDUCATION

University of the Philippines Cebu

Bachelor of Science in Computer Science

DOST-SEI Scholarship Recipient

Cebu City, Cebu

Aug. 2022 – Present

Philippine Science High School - MIMAROPA Region Campus

With High Honors - STEM Strand

Odiongan, Romblon

Aug. 2016 – May 2022

EXPERIENCE

Freelance Software Developer

January 2023 – Present

Upwork

Remote

- Developed and deployed full-stack software and website solutions tailored to client requirements, handling both frontend and backend development
- Implemented automation workflows using n8n and Zapier, streamlining business processes and reducing manual tasks
- Delivered GoHighLevel (GHL) projects, customizing CRM, marketing, and automation tools to improve client operations

Software Engineer Intern

June 2025 - September 2025

Alliance Software Inc.

Cebu City, Cebu

- Fixed 20+ software issues, including bugs and coding errors, improving overall system stability and performance
- Assisted in maintaining and enhancing legacy applications using PHP and ActionScript
- Contributed to the development and support of a Point-of-Sale (POS) system, ensuring accurate and reliable transaction processing

Full-Stack Developer Intern

September 2024 – November 2024

Bayoa Analytics

Mandaue City, Cebu

- Optimized database performance by 30%, as measured by faster query execution times, by creating and refining database schemas for deals and pipeline stages to ensure efficient data storage and retrieval
- Developed and tested CRUD APIs for deals and pipeline stages, resolving 14 issues and contributing to improved CRM functionality and a successful deployment
- Designed and implemented a card-based UI for pipeline summary, enhancing visual clarity and user interaction, as measured by positive user feedback, by organizing pipeline data into concise and visually appealing cards with key metrics

PROJECTS

Vulos | *Typescript, Next.js, CSS, Sanity*

Full Stack Web

- Developed a full-stack e-commerce platform for a thrift store with complete product listing and checkout functionality, by using TS, Next.js, CSS, and Sanity for headless CMS integration.
- Improved page load speed by 35%, as measured through Lighthouse performance scores, by optimizing images, minimizing CSS, and leveraging Next.js static generation and SSR
- Enhanced responsiveness across devices by applying mobile-first design and custom CSS styling

Regexify | *Next.js, React, Tailwind CSS, TypeScript, Vis.js*

Full Stack Web

- Built an interactive web application that converts regular expressions into Non-Deterministic Finite Automata (NFA), featuring dynamic visualization to support learning of automata theory concepts
- Designed an intuitive and engaging interface that simplifies complex automata operations, making theoretical concepts more accessible for students and educators

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, JavaScript, HTML/CSS, TypeScript

Frameworks: React, Node.js, Flask, Vue.js, Django, Tailwind CSS, Next.js, Angular

Developer Tools: N8N, Git, Docker, Google Cloud Platform, AWS, Azure, Zapier, GHL

Databases: PostgreSQL, MySQL, MongoDB, Firebase
